

## TOTALS OF HOUSEHOLDS AND HEARTHES AT LADY DAY 1672

This table is arranged by townships within wapentakes. In this table the wapentakes are arranged alphabetically, rather than geographically as they were in the transcript of the assessment. As in the transcript, the data for Osgoldcross wapentake is taken from the Lady Day 1673 assessment. All of the data from these assessments is also displayed in the form of maps 3 to 13, distributed in David Hey's 'Introduction: The West Riding in the Late Seventeenth Century'.

### Explanatory Note:

Whereas the figures in the columns of hearths 1 to 9 record the number of households, the figures in the 10+ column show the hearth numbers in individual houses in square brackets.

		-----Number of hearths-----										list of 10+	Total house- holds	Total hearths
		1	2	3	4	5	6	7	8	9	10+
